Telehealth Futures: Where to for Telehealth in Australia?

Video-consultation to specialists is now an established and growing part of routine health care delivery in rural Australia. However, a rich array of telehealth capabilities is emerging that are under-utilised in Australia.

Rather than a marginal enhancement of health care delivery, telehealth could become a central feature of metropolitan and rural health care delivery – for specialist AND primary care practitioners, providing opportunities for improved clinical outcomes, patient convenience and service efficiency.

- Date:** Wednesday, 4 September 2019
- Time:** 12:00pm – 12:30pm (Lunch PAH attendees)
