

QUEENSLAND DIGITAL HEALTH GRAND ROUND SERIES

DO WE REALLY NEED THAT MANDATORY DATA FIELD?

ALL STAFF
WELCOME

Your Director comes to you as she's been alerted that your clinical unit's rate of patients with pulmonary emboli has increased. You confirm that is correct but how do you get the information you need quickly enough to minimize ongoing harm?

Should we be using electronic medical records to collect non-numerical data to inform our findings quickly? As we move towards real time reporting how do we ensure our busy clinicians are documenting the right information at the right time and in the right place? Are mandatory data fields the key?

Presented by Dr Marianne Kirrane, Staff Specialist in Intensive Care and Medical Lead, Digital Metro North, MNHHS

Dr Marianne Kirrane MBChB BA(Hons) FCICM FCAI MPH(AMR) PGDipCU CHIA

Date: Tuesday 24 September 2019
