

QUEENSLAND DIGITAL HEALTH GRAND ROUND SERIES

ELECTRONIC MEDICINES MANAGEMENT: IMPLEMENTATION, OPTIMISATION AND SAFETY

All staff
welcome

The implementation of MedChart (an electronic prescribing and administration system) at Caboolture Hospital has been a recent success for Metro North Hospital and Health Service. But what can we learn from this? Is an electronic prescribing system better for medication safety? Are there any benefits to having an electronic prescribing system, and what are the challenges? The Metro North Electronic Medications Management program has explored these issues to gain meaningful lessons for sites with digital prescribing and those about to embark on the digital prescribing journey.

Presented by **Nicole Harper** | Evaluation Pharmacist, Electronic Medications Management Program, Digital Metro North Technology Services, MNHHS

Date: Tuesday, 25 February 2020

Time: 12.00pm – 12.30pm lunch served
